

PROBLEM Solution

Project:
Manhole Rehabilitation

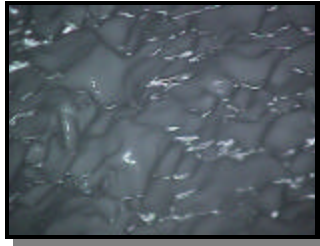

Owner:
Caloundra City Council

Installer:
Concure Australia

System:
EnviroLastic® AR 425

Area:
323 Sq. Ft. (30m²)

Completed:
April, 1999

After a product presentation to the Water & Sewage Engineers of the Caloundra City Council, three trial manholes were rehabilitated using EnviroLastic AR 425.

The EnviroLastic is the optimum product to use in this situation due to its fast cure, chemical and H₂SO₄ resistance, and ease of application.

The manholes were cleaned, primed and 2 millimeters of EnviroLastic AR 425 was applied.

The three (3) manholes were completed in two days by a 2-men crew.
