

PROBLEM *Solution*

Project:
NEW TANK LINER

Owner:
Harbor Fish
New Bedford, MA

General Contractor:
Engineered Polymer
Finishes (E.P.F)

Installer:
Gombert Industries, Inc.

System:
EnviroLastic® AR 425

Area:
1,600 Sq. Ft.

Completed:
July, 1999

Harbor Fish Company, in the heart of the fishing port of New Bedford, MA., was putting an addition on their Processing Building. Included would be a catch basin for water and fish scraps. E.P.F. was the coatings contractor on-site, but wasn't able to provide a coating to meet the criteria set forth by the owner.

E.P.F. had investigated polyurea coatings once before, and had literature and samples of EnviroLastic AR 425.

Gombert Industries, Inc. was selected as the EnviroLastic Certified Contractor and mobilized a work crew to sandblast, clean and coat the entire tank with EnviroLastic AR 425. The entire process was completed in 2 days.
