

PROBLEM *Solution*

Project:
TULSA NORTHSIDE
FLOW EQUALIZATION BASIN
Tulsa, Oklahoma

Owner:
City of Tulsa

Engineer:
Black & Veatch

Installer:
Mobile Enterprises, Inc.
Fort Worth, Texas

System:
EnviroLastic® AR 425

Area:
6,500 Sq. Ft.

Completed:
1995

Black and Veatch Engineers approved the use of EnviroLastic AR 425 on the Northside Flow Equalization Basin project in Tulsa, Oklahoma.

EnviroLastic was used (in lieu of another coating) to line all the interior surfaces of two (2) Septic/Vactor Reservoirs and one (1) Diversion Structure.

EnviroLastic AR 425 is ideal for confined space structures such as these due to the rapid cure and low odor.

EnviroLastic will provide immersion protection from 10% sulfuric acid, 5% sodium hydroxide, 5% ammonium hydroxide, 1% nitric acid, and 1% ferric chloride as required by the project specifications.
